

2D

Intergraph® CADWorx® DraftPro™ is a FREE, intelligent, AutoCAD®-based 2D plant design and layout solution that is easy to learn and use. CADWorx DraftPro uses the same piping specifications as CADWorx Plant Professional and even works with multiple versions of AutoCAD.

CADWorx® DraftPro™

- Always 100% FREE
- Intelligent 2D piping design
- Specification driven
- AutoCAD-based
- Plans, sections and elevations
- Bills of material
- 60,000 parametrically generated components
- Fully customizable
- Compatible with all supported AutoCAD releases
- Multiple languages
- Upgrade path to CADWorx Plant Professional

Efficient 2D Plant Design

CADWorx DraftPro has been developed for the quick and easy creation of fully intelligent 2D plant layouts, sections, elevation and plans.

AutoCAD-Based

Because CADWorx DraftPro is AutoCAD-based it sits on the most widely used CAD platform in the world.

Intelligent Drafting

CADWorx DraftPro is specification driven so we take the guesswork (and pain) out of placing piping components. That means items easily connect and piping automatically breaks when components are inserted.

Plans, Sections and Elevations

CADWorx DraftPro allows you to quickly and efficiently draw elevations and sections of your layouts to enable you to get an accurate BOM of your design.

Piping Specifications

Hundreds of ready-to-use specifications in metric and imperial formats are included that reference data files of over 60,000 piping components.

Customizable

CADWorx DraftPro components are parametrically generated on-the-fly—there are no disc-hogging blocks to worry about or maintain; components are quickly and efficiently drawn on demand, as you need them.

Intuitive Spec Editor

An intuitive spec editor allows piping specifications and component data files to be easily modified. You can even add unique components with complete intelligence.

Bills of Material

As each component is intelligent CADWorx DraftPro allows you to create accurate, user-configurable bills of material of your designs.

Compatible with Multiple AutoCAD Releases

As with all CADWorx products, CADWorx DraftPro works with all supported version of AutoCAD. So you don't have to upgrade your AutoCAD to start to draft intelligently!

Upgrade Path

When (or if) you are ready to move to 3D design you can do so knowing that the investment you've made in your CADWorx DraftPro specifications will not be wasted, because you can convert those specs into CADWorx Plant Professional specs at anytime.

English, French, Spanish, German...

CADWorx DraftPro ships with several languages and the included language files can be easily adapted to any language.

Technical Specs

- AutoCAD compatible
- Microsoft® Windows® XP Pro or Windows Vista® Ultimate (minimum)

Application Areas

Process and Plant Design, Piping, Equipment, Steelwork, Petrochemical, Chemical, Power, Offshore, Food, Beverage, Brewing, Pharmaceutical, Water Treatment, Building Services, Shipbuilding and Architectural.
